

Home Occupational Therapy Tools and Bin Ideas

Having easy access to tools during teletherapy will make sessions run more smoothly. I have listed some common household items in the bin below that can be used for a variety of activities. It is not necessary to have every item on the list. It will help me, when planning our sessions, to know what you do have and what you can place in a storage container, shelf or other space that is nearby during sessions.

Additional Helpful Tools

B/W printer/color printer

Laminator, paper protector sleeves or gallon Ziploc bags

Games

Puzzles
