Education for pediatricians
Use of screeners
Education and advocacy for other professionals such as feeding specialists (OTs and SLPs) who work with families, especially the NICU population.

"I knew something was wrong since birth. But I didn't find out he had EoE until 3.5 yrs old. And the pediatrician never directed me to a GI. I had to figure that out through my own research even though I brought feeding issues up every single time I went for a checkup."
