</table>

Red flag answers are in orange. If 2 or more of your answers are orange please contact your pediatrician.

Published in 2022 ICD-10-CM

R63.31 Pediatric feeding disorder, acute
(< 3 months)

R63.32 Pediatric feeding disorder, chronic
(≥ than 3 months)
INFANT SIGNS & SYMPTOMS OF PFD

Medical
- labored breathing with and without feeding
- color changes in lips or face when eating or drinking
- sweating when eating or drinking
- gurgle or squeaking sounds with and without feeding
- reoccurring upper respiratory infections
- crying, arching, coughing, grimacing when eating or drinking
- suspected food allergies
- multiple formula changes
- vomiting
- never seems hungry
- physical discomfort when eating or drinking

Nutrition
- unable to eat or drink enough to grow or stay hydrated
- insufficient or too rapid of a change in weight or height
- lack of a certain nutrient, i.e., iron, calcium
- need for nutritional supplements
- reliance on a particular food for nutrition
- need for enteral feeds for nutrition-NG, GT, TPN
- constipation
- limited dietary diversity for age
  - too few fruits and/or vegetables
  - limited or no protein source
  - too few foods eaten on a regular basis

Feeding Skill (12 months or less of age)
- labored, noisy breathing or gasping
- coughing, choking, gagging or retching
- gurgles or wet breaths
- loud and/or hard swallows or gulping
- unable to eat or drink enough for optimal growth
- excessively short mealtimes (< 5 minutes)
- excessively long mealtimes (> 30 minutes)
- need for thickened liquids
- need for special food or modified food texture
- need for special strategies, positioning or equipment
- unable to latch to breast or bottle without help
- weak suck
- need for pacing, flow management or rest breaks
- need for special equipment to breast or bottle feed
- often too tired to eat or quickly falls asleep when eating
- breast or bottle feeds best when asleep, i.e., dream feeds
- unable to transition to solids
- unable to wean from breast or bottle

Psychosocial
- unable to come to or stay with the family at meals
- refusal to eat what is offered or to eat at all
- disruptive mealtime behaviors
- unable to eat with others present at mealtimes
- child stress, worry or fear during meals
- caregiver stress, worry or fear when feeding child
- presence of bribes, threats, yelling at mealtimes
- need for distraction and/or rewards for eating
- unpleasant mealtime interactions between caregiver and child

Are signs of PFD present?
If yes, refer early and often for early identification of PFD.
Recommended Referrals:
☐ Medical ☐ Nutrition ☐ Feeding skill ☐ Psychosocial
