

EMILY ADAMS

Personally, I'm the mama to a 5 yo girl with PFD and professionally, I'm a VP at USI Insurance helping mid to large companies with their Employee Benefits.

Financial Disclosures: None

Non-Financial Disclosures: Has a child with pediatric feeding disorder, is a member of the Feeding Matters Family Advisory Council, is a member of the Feeding Matters Board of Directors.

SCOTT BERNS, MD, MDH, FAAP

Berns has served as President and CEO at the National Institute for Children's Health Quality (NICHQ) since 2015, where he applies his extensive experience working across academic, clinical, nonprofit, community, and public health settings to lead initiatives aimed at driving change to improve children's health. Berns is a nationally recognized expert in quality improvement science in maternal and child health and has published extensively.

Berns is also Co-Founder and Board Chair of The Progeria Research Foundation (PRF). He ensured PRF was a key force behind the Progeria gene discovery and has developed impactful international programs for Progeria families and researchers. In addition, he currently serves on the Executive Committee of the American Academy of Pediatrics' Council on Quality Improvement and Patient Safety, American Academy of Pediatrics. Prior to joining NICHQ, Berns spent 14 years at the March of Dimes National Office serving as the Senior Vice President of Chapter Programs and the Deputy Medical Officer. He provided direction in education and community services to all March of Dimes state-based chapters, including DC and Puerto Rico.

Berns is a board-certified pediatrician and pediatric emergency physician. He is a Clinical Professor of Pediatrics at the Warren Alpert Medical School of Brown University and Clinical Professor of Health Services, Policy and Practice at the Brown School of Public Health. Berns also completed a one-year White House Fellowship where he served as a Senior Advisor to the U.S. Secretary of Transportation.

Financial Disclosures: Scott receives a salary from the National Institute for Children's Health Quality. Feeding Matters has made a donation to NICHQ in exchange for Dr. Berns's presentation.

Non-Financial Disclosures: None

JENNIFER CASTEIX, MS, CCC-SLP

Jennifer Casteix, MS, CCC-SLP, is an associate clinical professor and SLP specializing in working with children and adolescents with complex communication/feeding needs. She provided services for 25 years in the NICU and PICU in the two pediatric medical centers in Tucson. Ms. Casteix currently mentors graduate students and teaches the Pediatric Dysphagia course at the UA.

Financial Disclosures: Ms. Casteix is employed by The University of Arizona where she receives a salary.

Non-financial Disclosures: Ms. Casteix is a member of the 2022 Program Committee. She is also a member of ASHA and on the ArSHA board.

GILSON CAPILOUTO, PHD, CCC-SLP

Gilson Capilouto Ph.D. is a speech-language pathologist with more than 40 years of experience in assessment and treatment of pediatric feeding and swallowing disorders. She is co-inventor of an FDA

cleared smart bottle used in hospitals across the US and internationally, that generates real-time objective data on infant sucking performance.

Financial Disclosures: Gilson Capilouto is a paid adjunct professor at the University of Kentucky, Lexington, KY. She is a Co-founder, shareholder, and board member of NFANT Labs, LLC, Marietta, GA.

Non-financial Disclosures: Gilson Capilouto is a member of the 2022 IPFDC Committee.

ALBA CHESTER

Alba is originally from Puerto Rico. In 2014 she and her husband Travis settled in Arizona to raise their three boys. All three of her children have had PFD since infancy. Alba became a Power of Two Coach in 2017 and then joined the Family Advisory Council in 2019.

Financial Disclosures: None

Non-financial Disclosures: Has 3 children with pediatric feeding disorder, is a member of the Feeding Matters Family Advisory Council, and a family coach for Feeding Matters.

MONICA DAVIS

Monica, a Phoenix resident, has two daughters, Genevieve (9) and Cecilia (7). She became aware of Feeding Matters after attending a luncheon in 2018 where she felt hope for her feeding struggles with Cecilia who has IgE allergies and chronic FPIES. Monica joined the Family Advisory Council in 2020.

Financial Disclosures: None

Non-financial Disclosures: Has a child with pediatric feeding disorder and is a member of the Feeding Matters Family Advisory Council.

MICHELLE DAWSON, MS, CCC-SLP, CLC

Michelle Dawson, MS, CCC-SLP, CLC, speech-language pathologist with Therapeutic Designs and Services in Hartsville, SC, is the acclaimed host of "First Bite: Fed, Fun, Functional" a weekly Speech Therapy Podcast that addresses "all things" Pediatric Speech Therapy which is presented by SpeechTherapyPD.com. Recently, Michelle authored, "Chasing the Swallow: Truth, Science, and Hope for Pediatric Feeding and Swallowing Disorders". She is an accomplished lecturer; traveling across the nation delivering courses on best practices for evaluation and treatment of the medically complex infant, toddler, and child with respect to their pediatric oropharyngeal dysphagia, pediatric feeding disorder, as well as language acquisition within the framework of Early Intervention. She has served as the Treasurer for the Council of State Association Presidents, is a Past President of the South Carolina Speech, Language, and Hearing Association, a 2017 graduate of the American Speech-Language-Hearing Association's Leadership Development Program, a 2020 recipient of the Pediatric Feeding Disorder Awareness Champion from Feeding Matters, a 2021 recipient of the Louis M. DiCarlo Award for Outstanding Clinical Achievement from the South Carolina Speech, Language, and Hearing Association, a 2021 recipient of the State Clinical Achievement Award from the American Speech-Language-Hearing Association Foundation, and seven-time recipient of American Speech-Language-Hearing Association's ACE Award for continuing education.

Financial Disclosures: Michelle Dawson is a speech-language pathologist with Therapeutic Designs and Services, in Hartsville, South Carolina, for which she receives a salary. Michelle authored, "Chasing the Swallow: Truth, Science, and Hope for Pediatric Feeding and Swallowing Disorders" from which she receives royalties from the sale of it. She is the host of "First Bite: A Speech Therapy Podcast" for which she receives compensation from SpeechTherapyPD.com. She also receives compensation for numerous presentations from SpeechTherapyPD.com and compensation for a presentation with PESI, Inc.

Non-financial Disclosures: Michelle Dawson is a volunteer with Feeding Matters, a former Treasurer with

the Council of State Association Presidents, and a Past President with South Carolina Speech, Language, and Hearing Association (SCSHA). She is a member of SCSHA, ASHA, and the Dysphagia Research Society (DRS).

AMY L. DELANEY, PH.D., CCC-SLP

Dr. Delaney is an Assistant Professor in Speech-Pathology & Audiology at Marquette University. She is the Director of the Neurodevelopmental Feeding and Swallowing Lab focusing on the identification of a norm-reference for feeding development to establish diagnostic criteria and assessment tools for the early and accurate diagnosis of pediatric feeding disorder. Dr. Delaney worked at Children's Hospital of Wisconsin for 20 years in advanced diagnostics and intervention for medically complex children with PFD and dysphagia.

Financial Disclosures: Amy Delaney receives a salary from Marquette University.

Non-Financial Disclosures: Serves as educational pillar chair for Feeding Matters. Serves on ASHA's annual conference planning committee.

ISURU DHARMARATHNA, PHD

Isuru Dharmarathna received her doctorate at the University of Auckland, New Zealand and currently works as a lecturer in speech-language pathology at the University of Kelaniya, Sri Lanka. Her doctoral research on 'profiling objective quantitative videofluoroscopic measures of swallowing in children' has been published and recognised widely internationally for its contribution and the session is based on how objective swallow measures of infants can be obtained in under-resourced clinical contexts.

Financial Disclosures: Receives a salary from Avati, National Centre for Children with Disabilities and University of Kelaniya, Sri Lanka; Received an honorarium from Feeding Matters.

Non-financial Disclosures: None

CHRIS ELLIOT B.MED (HONS) FRACP

Dr Chris Elliot is a General and Developmental paediatrician in Sydney, Australia. He conceived of and co-leads the SUCCEED Child Feeding Alliance, an Australian collaboration formed in 2017 between families, clinicians and researchers all focused on children with paediatric feeding disorder, especially those children who require tube-feeding. Dr Elliot works in both the public and private sectors, is a popular author and teacher and sits on the board of the Journal of Paediatrics and Child Health.

Financial Disclosures: Receiving an honorarium from Feeding Matters.

Non-Financial Disclosures: None

HAYLEY ESTREM, PHD, RN

Hayley Estrem, PhD, RN, is an assistant professor in the School of Nursing at University of North Carolina Wilmington. Dr. Estrem's primary research interests are guided by the NIH Symptom Science model and aim to improve family-centered care for children with PFD and/or developmental disabilities. In her research program, Dr. Estrem combines patient centered outcomes measure development, multi-method integration, and the goal of family-centered care for infants and children with special health care needs. Dr. Estrem's work started with concept analysis of pediatric feeding problems and measure development and she frequently works with interdisciplinary teams to build evidence that addresses the needs of families and children with PFD. She is the current Research Pillar chair for Feeding Matters and has a child with PFD who inspired her to pursue a career in feeding research.

Financial Disclosures: I receive a salary from University of North Carolina Wilmington, This study analysis was funded by the Marcus Foundation. Receiving an honorarium from Feeding Matters for the 9th International Pediatric Feeding Disorder Conference.

Non-Financial Disclosures: I am a founding member of the Feeding Flock research group, I am a Feeding Matters Pillar chair, and I have a child with PFD.

LAUREN FIECHTNER, MD, MPH

Lauren Fiechtner, MD, MPH is the Director of Nutrition in the Divisions of Gastroenterology and Nutrition and General Academic Pediatrics at MassGeneral Hospital for Children and the Senior Health and Research Advisor at the Greater Boston Food Bank. Her interests include reducing nutrition related health disparities with a particular focus on childhood obesity and feeding disorders.

Financial Disclosures: None

Non-Financial Disclosures: None

SHANNON FORD, PHD, RN, CPNP, CNE

Over the years, my passion for the clinical scope of nursing and nursing education created a curiosity and desire to expand my nursing skills at the level of research. I have been focused on assessing the collective impact of interacting and coalescing biological, psychological, and social symptoms that have potential mechanisms through the gut-brain-axis on pediatric health outcomes. The main goal of my research was to study multi-dimensional networks to increase understanding of the relationship between biological, psychological, and social symptoms that produce physiologic and/or psychosocial and behavioral outcomes in adolescents in the ABCD Study. I have also had the great pleasure and opportunity to collaborate with amazing researchers to explore various attributes of wellness through data analysis and visualization to improve understanding and support of pediatric population health.

Financial Disclosures: Salary from UNC-CH, UNCG, & UNCW, Dr. Jinhee Park's Boston College start-up research fund. Dr. Ford is a Postdoctoral Scholar at the University of North Carolina at Greensboro (UNCG), a Nurse Practitioner at Lincoln Community Center, and a Clinical Instructor at UNC Chapel Hill and Wilmington (UNC-CH & UNCW).

Non-Financial Disclosures: None

RAQUEL GARCIA, SLP-D, CCC-SLP, CLC, CNT, BCS-S

Dr. Raquel Garcia is a feeding, swallowing, and craniofacial speech-language pathologist who works in infant critical care units. Additionally, she teaches and mentors feeding and swallowing at the graduate and doctoral level. Her clinical interests include upper airway disorders, infant feeding, neonatal care, and dysphagia.

Financial Disclosures: Dr. Garcia is employed by Nova Southeastern University where she receives a salary.

Non-Financial Disclosures: Dr. Garcia is the secretary for the 2022 Program Committee. She is also a member of ASHA and is actively engaged in different committees, including being a member at large for SIG 13 and VP of Professional Practice for the Hispanic Caucus. She is also on the executive board of FLASHA.

MEMORIE GOSA

Memorie M. Gosa, PhD, CCC-SLP, BCS-S is a pediatric speech-language pathologist, board certified specialist in swallowing and swallowing disorders, and associate professor and chair of the Communicative Disorders Department at The University of Alabama. She has twenty years of clinical and research experience related to pediatric feeding development and disorders. Her research focuses on exploring the reliability and validity of common assessments and treatment techniques used in the diagnosis and management of pediatric feeding and swallowing disorders. She has published book chapters and peer-reviewed papers on these topics. She is the co-editor of the recent textbook, *Assessing and Treating Dysphagia: A Lifespan Perspective* and frequently presents on topics related to pediatric feeding disorder.

Financial Disclosures: Receives a salary from University of Alabama; Received an honorarium from Feeding Matters.

Non-Financial Disclosures: Elected member of the Council on Academic Accreditation. Editorial Board for *American Journal of Speech-Language Pathology*.

JESSICA GOWANS

Jessica is the parent of two incredible children, aged 8 and 5, who are tube-fed. Jess works as a Registered Psychologist in Sydney, Australia, with special interest in supporting Carer Mental Health. Jess is a co-founder and coordinator of a Sydney-based Parent/Carer/Consumer tube feeding support group.

Financial Disclosures: None

Non-Financial Disclosures: None

STEPHANIE HARSHMAN, PHD, RD, LDA

Stephanie Harshman, PhD RD LD, is a research fellow in Neuroendocrinology at Mass General Hospital and a dietitian in The Center for Feeding and Nutrition at Massachusetts General Hospital for Children. Dr. Harshman's research focuses on identifying the impact of the gut microbiome and neuroendocrine signaling in pediatric feeding and eating disorders.

Financial Disclosures: Stephanie receives a salary from Massachusetts General Hospital for Children.

Non-Financial Disclosures: None

NICK HOPWOOD, PHD

Dr Hopwood is Professor of Education at the University of Technology Sydney (UTS) School of International Studies & Education, and Extraordinary Professor in the Department of Curriculum Studies at Stellenbosch University (South Africa). He has over a decade of experience researching services that support parents of young children, and has been a co-leader of the SUCCEED Study since its inception. In this study his role focuses on co-developing educational resources to improve health practices and help everyone in families with children who tube-feed thrive.

Financial Disclosures: Nick receives a salary from University of Technology Sydney.

Non-Financial Disclosures: None

SARAH JAMES, SPEECH PATHOLOGIST

Sarah is a Speech Pathologist who graduated from La Trobe University in Melbourne in 2003 and has since gained broad experience in dysphagia and feeding while working in London and Melbourne and now specialises in paediatrics. Sarah has been the Complex Care Speech Pathologist at the Royal Children's Hospital for the past 4 years where she has focussed on a medically complex patient cohort with a special interest in paediatric feeding disorders and tube weaning. Sarah, with her colleague Rachael Martin (Dietitian), developed the 'Tube Weaning & Complex Feeding Service' at the Royal Children's Hospital which has resulted in streamlined consistent therapy with improved feeding outcomes for the complex care hub patient group.

Financial Disclosures: Sarah James receives a salary from Royal Children's Hospital.

Non-Financial Disclosures: None

HOLLY KNOTOWICZ, MS, CCC-SLP

Holly Knotowicz, M.S., CCC-SLP, holds a Master of Science degree in Communication Sciences and Disorders from Nazareth College. She is a Speech Language Pathologist and a Feeding and Swallowing specialist with over 10 years of experience. Holly believes in utilizing a blended and individualized approach to feeding. She specializes in working with children who have eosinophilic gastrointestinal diseases, including eosinophilic esophagitis and working with children who have food allergies, FPIES and neurogenic disorders. She is an active participant in research, has been published in Gastroenterology Journal and is an international speaker on feeding.

Financial Disclosures: Picky Eaters Anonymous- salary; Select Medical- salary; My Munch Bug- Melanie Potock- speaker fees; EZPZ -ambassador fee. Receiving an honorarium from Feeding Matters.

Non-Financial Disclosures: APFED Member, Member of Serious Fun Camp committee member, International Pediatric Feeding Disorder member.

CINDY LUND, PHD, CCC-SLP, C/NDT

Cindy Lund holds a PhD in Health Sciences from Northern Illinois University and a MS in Communication Sciences and Disorders from the University of Wisconsin-Milwaukee. She is currently an Assistant Professor of Speech-Language Pathology at Concordia University Wisconsin. Dr. Lund has over 20 years of clinical experience working with infants and children with pediatric feeding disorder (PFD), across a variety of settings. She has completed extensive continuing education and training in the area of pediatric feeding and swallowing and is certified in Neurodevelopmental Treatment. Dr. Lund's research is currently focused on infants and children with PFD and applications to clinical practice.

Financial Disclosures: Salary from Concordia University.

Non-Financial Disclosures: None

RACHAEL MARTIN, DIETITIAN

Rachael Martin is a senior paediatric dietitian currently working at the Royal Children's Hospital (RCH) in Melbourne and has extensive experience as a clinical dietitian and has worked in paediatrics for over 18 years. During this time, she has managed workloads in many clinical areas, and currently works within the RCH Complex Care Hub. This unit was developed over 6 years ago to streamline the care required by the state's medically complex and fragile children. Majority of the complex care hub patients require nutrition intervention, which is primarily via a feeding tube as either a supplement to oral intake or for full nutrition support. Rachael, along with her colleague Sarah James, a speech pathologist, developed a complex feeding service 4 years ago with a focus on actively tube weaning complex patients and supporting therapy to reduce aversions.

Financial Disclosures: Rachael Martin receives a salary from Royal Children's Hospital.

Non-Financial Disclosures: None

SUZY MEJIA-BUENANO, MSC IN APPLIED BEHAVIOUR ANALYSIS IN IDD

Suzy is a PhD Researcher in Applied Psychology at the Tizard Centre, University of Kent in the UK. She is also a Lecturer and Graduate Teaching Assistant at the Tizard Centre. Suzy has a Masters degree in Applied Behaviour Analysis in Intellectual and Developmental Disability and is a Board Certified Behaviour Analyst. She first became interested in pediatric feeding disorders when supporting autistic children and children with neurodevelopmental disabilities in the US. She is committed to disseminating evidence-based practice for pediatric feeding disorders internationally and improving the quality of services for pediatric feeding disorders available in the UK.

Financial: Suzy Mejia-Buenanao receives a salary from Tizard Centre, University of Kent.

Non-Financial: Certified by the Behavior Analyst Certification Board, student member of the UK Society for Behaviour Analysis.

AMBER MIERAS

I live in Peoria, AZ and am a mother of two. My son, Jax, has Down Syndrome and has struggled with eating since birth. He is now 8 years old and we have learned about the importance of celebrating the smallest successes and surrounding yourself with a strong community.

Financial Disclosures: None

Non-Financial Disclosures: Has a child with pediatric feeding disorder and is a member of the Feeding Matters Family Advisory Council.

BRIANNA MILUK MS, CCC-SLP, CLC

Brianna Miluk is a pediatric speech-language pathologist who currently works in the home health and outpatient settings. Her professional focus is on infants and medically-complex children with pediatric feeding disorders. Brianna is passionate about providing research-based, family-centered care and clinical mentorship to support the growth of quality feeding therapists.

Financial: Brianna is the founder and CEO of Pediatric Feeding Therapy, LLC. Bri is a contract employee with Earthshine Speech and Language. Bri is a contractor with Feeding Matters.

Non-Financial: Bri is the founder and president of the Pediatric Feeding Disorder Foundation. She is also a volunteer ambassador for Feeding Matters. Bri manages the Instagram page @pediatricfeedingSLP and co-hosts the podcast The Feeding Pod. Brianna is also VP of Professional and Clinical Affairs for the South Carolina Speech Language Hearing Association.

RICHARD J NOEL, MD, PHD

Trained in the care of children with complex airway disorders and the interdisciplinary care of children with feeding disorders, Dr. Noel's clinical and research interests include pediatric feeding disorder (PFD), eosinophilic diseases of the GI tract, and pediatric endoscopy.

Financial Disclosures: Receives a salary from Duke University Medical Center.

Non-Financial Disclosures: Volunteer Medical Director for Feeding Matters.

JUNE OKADA, MS, CF-SLP, CLC

June Okada is a speech-language pathology clinical fellow at Boston Children's Hospital. She received her masters degree from MGH Institute of Health Professions and is currently specializing in pediatric feeding difficulties.

Financial Disclosures: June Okada receives a salary from Boston Children's Hospital.

Non-Financial Disclosures: None

BARBARA OROURKE, RN-NIC

Barb is a clinical staff nurse in the NICU at Blank Children's Hospital in Des Moines, IA. She has over 30 years of experience as a NICU nurse. Barb is also an NICU researcher, educator, consultant, and speaker. Her passion is teaching how individualized developmental care and milk drops can affect the very premature infant long term.

Financial Disclosures: None

Non-Financial Disclosures: None

JINHEE PARK, PHD, RN

Jinhee Park, PhD, RN is an assistant professor at the Boston College Connell School of Nursing. Dr. Park's clinical background is in neonatal nursing. Her research focuses on improving the understanding of feeding problems among vulnerable infants and young children, with an overall goal of supporting their health and developmental outcomes, and helping families manage their complex feeding needs. Dr. Park has conducted a series of studies to advance science in the health care of infants and young children with feeding problems utilizing a multi-method approach, which includes biobehavioral methods (the integration of physiology and behavioral observation), advanced quantitative analytic methods (trajectory analysis, latent class analysis), mixed methods, symptom science, and the development of measures.

Financial: I receive a salary from Boston College. This study analysis was funded by the Marcus Foundation.

Non-Financial: I am a founding member of the Feeding Flock research group.

BRANDT PERRY

Brandt Perry is a native of Arizona, where he and his wife Krya raise three energetic children – Austin (8), Brayden (6) and Sydney (3). The family's first encounter with Feeding Matters came in 2016 when 18-month-old Brayden was diagnosed with Eosinophilic Esophagitis (EoE) and severe food allergies and the Perrys were searching for information to navigate the new path in front of them. Brayden eats 100% through his G-tube, but that doesn't slow him down. Brayden's younger sister, Sydney was diagnosed with Food Protein-Induced Enterocolitis Syndrome (FPIES) and numerous food allergies. She also has a G-tube but eats orally as well, which challenges Brandt and Krya to expand their culinary creativity. Fortunately, big brother Austin provides great support to the whole family and simplifies meals by preferring mac & cheese or pizza.

Brandt began serving on Feeding Matters Family Advisory Council began in 2018 and as a Power of Two Coach in 2019. Outside of his involvement with Feeding Matters, Brandt's philanthropic involvement includes serving Habitat for Humanity, Scottsdale Active 20-30 Club and Phoenix Children's Hospital Leadership Circle. These actions are driven by Brandt's belief that we have a responsibility to give back, to leave the world better than we found it.

Brandt earned a Bachelor of Science degree in Accounting from Arizona State University (ASU) and a Master of Business Administration degree from The University of Arizona (UofA), which ensures he always has a winning team in the annual ASU - UofA Territorial Cup football game. Brandt's current professional endeavors focus on developing markets and implementing healthcare imaging solutions around the globe as Vice President of Global Distribution for Orthoscan Inc.

Krya and Brandt love outdoor adventures and strive to inspire that same wonder and appreciation of nature in Austin, Brayden and Sydney. The Perry family, and Coco their Great Dane, seizes every opportunity to go camping, hiking, biking, rock climbing, kayaking and exploring.

Financial Disclosures: None

Non-Financial Disclosures: Brandt Perry serves as the Family Advisory Council Chair on the Feeding Matters Family Advisory Council; PFDA Support Pillar Lead; volunteer with Feeding Matters. Brandt is a parent of a child with PFD.

KAITLIN PROCTOR, PHD

Kaitlin Proctor, PhD, earned her doctorate in clinical psychology from Auburn University. She completed her predoctoral internship at the University of Oklahoma Health Sciences Center and her postdoctoral residency at Children's Healthcare of Atlanta in partnership with Emory University School of Medicine. Her training

focused on the application of behavioral interventions and caregiver training to address an array of pediatric concerns, such as disruptive behaviors, anxiety, pain and illness coping, and medication adherence. She currently serves as a psychologist in the Children's Multidisciplinary Feeding Program at Children's Healthcare of Atlanta. Her clinical work focuses on providing assessment and treatment services for children with pediatric feeding disorders and their families as part of a collaborative, multidisciplinary team in outpatient and intensive day treatment programs. Her current research efforts involve active partnership with the CHOA Food Allergy Center at Emory and Children's, with a focus on supporting patients and families coping with food allergy and comorbid feeding concerns.

Financial Disclosures: I receive a salary from Children's Healthcare of Atlanta, This study analysis was funded by the Marcus Foundation.

Non-Financial Disclosures : None

PAULA RABAEY, PHD, OTR/L

Paula Rabaey, Ph.D., is Associate Professor of Occupational Therapy at St. Catherine University in St. Paul, MN. She has 25+ years clinical experience in pediatric occupational therapy including early intervention and feeding, eating, and swallowing. She is a feeding technical expert for SPOON Foundation and has developed a curriculum to train caregivers in orphanages around the world to safely feed children with disabilities. She presented on pediatric feeding and assessment strategies in Tula, Russia in May 2019 and at the 2nd Annual OT conference in Morocco January 2020. Her dissertation focused on the meaning of mealtime for African American mothers and their young children living in under-resourced areas which was presented at the World Federation of Occupational Therapy Conference in South Africa in 2018.

Financial Disclosures: Associate Professor at St. Catherine University where she receives a salary.

Non-Financial Disclosures: Serves as a member of AOTA, WFOT, and SSO-USA

SUSAN RAMAGE, RN, MN

Susan Ramage is the school nurse at the Experimental Education Unit at the Haring Center. She is dedicated to bringing nutrition education to the school and helping children and families explore fun ways to eat healthy foods. Susan is interested in sharing ways to work with schools and early learning settings to increase nutrition education and mealtime support.

Financial: Susan receives a salary from Haring Center. My presentation will not be used to sell a product or service.

Non-Financial: Currently working on publishing our curriculum into a book.

KALLIA RESKE

Ms. Reske is a senior at Marquette University majoring in Speech Pathology & Audiology with a minor in Spanish for Health Professions. She has worked in Dr. Amy Delaney's Neurodevelopmental Feeding & Swallowing Lab (NDFS) since Summer 2020. She was a Marquette University Biomedical Sciences Summer Research Program Fellow (Summer 2021) in Dr. Delaney's NDFS Lab and has continued her work as a research assistant. Ms. Reske was a research assistant in Dr. Steven Long's English Accented Spanish Lab from Fall 2018 to Spring 2019.

Financial Disclosures: Kallia Reske and the Department of Speech Pathology & Audiology have received funding from the Marquette University Biomedical Sciences Summer Research Program.

Non-Financial Disclosures: None

BIANCA ROE, OTD, OTR/L, RDN

Bianca started her career as a pediatric dietitian specializing in children with complex medical needs, especially those with food allergies and feeding tubes. After working alongside some incredible feeding therapists, she returned to school to complete her doctorate in occupational therapy. She now serves the community in Chicago, IL. She is a Registered Dietitian and Occupational Therapist at Communication Clubhouse in Chicago, IL.

Financial Disclosures: Dr. Roe is employed by Communication Clubhouse where she receives a salary.

Non-Financial Disclosures: Dr. Roe is a member of the 2022 IPFDC Committee. She is also a member of AOTA and AND.

CUYLER ROMEO, M.O.T., OTR/L, SCFES, IBCLC

Occupational Therapist and Pediatric Feeding Specialist Cuyler Romeo's extensive leadership and clinical experience are instrumental in the execution and management of Feeding Matters' strategic initiatives. In partnership with the CEO, Jaclyn Pederson, Cuyler collaborates with constituents to identify, track, and assess innovative approaches to the PFD system of care. Cuyler also facilitates strategic partnerships with select professional associations including the American Occupational Therapy Association (AOTA). Prior to joining Feeding Matters, Cuyler served as a founding partner of Mealtime Connections, LLC, and gained valuable insight on funding trends and industry implications as the director of clinical innovations at Therapy 2000. She is currently a treating clinician in Banner University Medical Center's NICU and works to advance the feeding skill domain by facilitating AOTA's mealtime Occupations: Feeding, Eating, and Swallowing Community of Practice.

Financial: Cuyler Romeo receives a salary from Feeding Matters and hourly compensation from Banner University Medical Center Tucson.

Nonfinancial: Cuyler Romeo is the lead facilitator for AOTA's Mealtime Occupation: Feeding, Eating and Swallowing Community of Practice. She serves on the Board of Directors and the Certification Committee for the Institute of Perception-Action Approach. She is a member of AOTA, ArizOTA, and IAPFS.

CAROLYN ROSS, MS, PHD

Carolyn Ross is a Professor in the School of Food Science at Washington State University (WSU) and Affiliate Professor in the WSU School of Medicine. She earned her BSc. in nutrition from the University of Manitoba, M.Sc. from the University of Guelph in food science, and Ph.D. from Michigan State University in food science/environmental toxicology. The overall objectives of Dr. Ross' research and graduate education program are to understand the theoretical basis underpinning the sensory perception of foods and correlate these psychophysical attributes with quantifiable characteristics. Dr. Ross has also expanded her research to study food texture perception in children. Since starting at WSU in 2004, Dr. Ross has established her lab and the WSU Sensory Science Center as a center for graduate student training in sensory science and analytical chemistry, publishing over 130 scientific research articles. Dr. Ross was also recently awarded the WSU Faculty Excellence Award for Instruction.

Financial Disclosures: Holds a full time job at Washington State University. Received an honorarium from Feeding Matters for the 9th International Pediatric Feeding Disorder Conference.

Non-Financial Disclosures: None

ERIN SUNDETH ROSS, PHD, CCC-SLP

Dr. Erin Ross received her Ph.D from the University of Colorado in 2007, followed by a 2-year Post-Doctoral Fellowship in the Section of Nutrition at the University of Colorado Denver. Her Master's Degree is in Speech and Language Pathology, from California State University Stanislaus, which she received in 1988. Dr. Ross is currently an assistant clinical professor in the Department of Pediatrics, School of Medicine, University of Colorado and is on faculty at the Rocky Mountain University of Health Professions. She has authored several book chapters and publications related to feeding preterm infants, infants with medical comorbidities, and

children with pediatric feeding disorder (PFD). Dr. Ross provides clinical consultation to several NICUs within the HealthONE system in Denver, in addition to providing professional education and research consultation through Feeding Fundamentals. She created SOFFI®, a training program for caregivers in the NICU and in Early Intervention.

Financial Disclosures: Consultant for Gerber Foods and for Intertek; speaker for Toomey & Associates, and I receive a salary from Feeding Fundamentals, LLC. My presentation will not be used to sell a product or service.

Non-Financial Disclosures: Chair of Advocacy Committee, Feeding Matters.

MARION RUSSELL, OTD, MOTR/L, SCFES

Dr. Marion Russell is an assistant professor in the Occupational Therapy program at Creighton University and a member of a specialized feeding and eating therapy team at the NoTube Interdisciplinary Therapy Center in Graz, Austria. She is an AOTA certified Eating, Feeding and Swallowing Therapist and specializes in enteral tube weaning and telemedical services.

Financial Disclosures: Dr. Russell is employed by Creighton University and receives a salary. She is also employed at NoTube LLC, and is a contracted employee.

Non-Financial Disclosures: Dr. Russell is a member of the 2022 IPFDC Committee. She is also a member of AOTA.

GRACE SCHUMACHER

Grace is a behavioral health dietitian and certified nutrition therapist serving Alaskans in a private practice. Her client population includes individuals and their families with eating disorders, feeding disorders, and sensory aversions to foods and eating environments. Grace is also an occupational therapy student with Creighton University's Alaska pathway and plans to continue meeting client needs in Alaska.

Financial Disclosures: Receives a salary from Nutrition Partnership, LLC.

Non-Financial Disclosures: Grace is a member of the 2022 IPFDC Committee.

MEG SIMIONE, PHD, CCC-SLP

Meg Simione, PhD CCC-SLP, is an Instructor of Pediatrics at Harvard Medical School, research scientist, and speech-language pathologist at MassGeneral Hospital for Children. She specializes in pediatric feeding and swallowing. Dr. Simione's research focuses on infant and child feeding and growth, pediatric feeding disorders, and implementation science.

Financial Disclosures: Dr. Simione is employed by the Massachusetts General Hospital where she receives a salary.

Non-Financial Disclosures: Dr. Simione is the chair of the 2022 IPFDC Committee. She is also a member of ASHA.

SARAH SMITH-SIMPSON, MS, PHD

Sarah Smith-Simpson is currently a Principal Scientist of Sensory and Consumer Insights for Nestle Nutrition Gerber Baby Food in Fremont, MI. In her current role, she is responsible for helping guide the development of innovative products and services that assist parents with enjoyable and successful mealtimes where children eat foods that meet their nutritional needs and encourage development of feeding skills. Ms. Smith-Simpson holds a PhD degree from Rutgers University in Food Science, a MS degree in Food Science from Michigan State University, and a BS degree also from Michigan State University in Nutritional Sciences.

Financial Disclosures: Sarah Smith-Simpson holds a full-time job at Nestle.

Non-Financial Disclosures: None

CHRISTIAN STILP, PHD

Ph.D. in Experimental Psychology, University of Wisconsin – Department of Psychology, 2011. Post-doctoral trainee in Electrical Engineering and Computer Sciences, Case Western Reserve University, 2011-2012. Associate Professor in the Department of Psychological and Brain Sciences at the University of Louisville.

Financial Disclosures: Christian Stilp is employed by the University of Louisville. Receives a stipend from ASHA.

Non-Financial Disclosures: None

KAY A TOOMEY, PhD

Dr. Kay A. Toomey is a pediatric psychologist and developer of the SOS Approach to Feeding. She is president of Toomey & Associates, Inc. and has worked clinically with children who struggle to eat for 35 years in hospital, outpatient clinic and home settings. Dr. Toomey is an invited national and international speaker.

Financial Disclosures: Dr. Toomey is employed by Toomey & Associates Inc. where she receives a salary.

Dr. Toomey is a paid speaker for Toomey & Associates, Inc. and the PESI company.
