

# October 2023

## About the Course:

Learn a step-by-step approach for helping children explore food, enjoy eating, and participate joyfully and independently in social mealtimes. The AEIOU approach—acceptance, exposure, independence, observation and understanding—is a responsive feeding approach that offers a highly successful method for integrated treatment of infants and young children with mild to complex etiologies. Learn to meet families where they are, provide effective family coaching and parent training, and make progress! Participants will leave with extensive knowledge, resources, and practical information: improve quality of mealtime, manage tube dependency and transition to eating solid foods, treat sensory food aversions, improve oral-motor skills, and more. Participants will be well equipped to help families achieve home carryover. Many special populations are discussed including: prematurity, GERD, allergies, autism, failure to thrive, tracheostomy, picky eaters, tongue and lip ties, and children with various syndromes. ASHA and AOTA CEUs

3 live broadcast sessions on **Mondays at 7pm (US Eastern) on October 9, 16, and 23** with self-paced video modules assigned during the weeks in between. **All requirements must be completed by October 30th.**

Continued access to course platform and private community for an additional month.

## Hybrid Online Course:

- 20 Hours Total (10 hours live excluding breaks; 10 hours Self-Paced Online)
- 3 live broadcast sessions (one per week) with live Q&A (must attend live-live sessions are NOT recorded)
- Self-Paced Video Modules assigned each week (set aside about 5 hours on week one, 4 hours on week two, and about two hours on week three)
- Private online course community and instructor support throughout the course
- Includes BONUS handouts/materials and "Extend Your Learning" lessons
- Includes Comprehensive Course Manual with References and Resources
- Course presented in English

# AEIOU: An Integrated Approach to Pediatric Feeding

## Instructor: Nina Ayd Johanson

The owner of Food Smart Kids, LLC, Nina Ayd Johanson, MA, MS, CCC-SLP, CLC, is a highly regarded clinician and renowned instructor with more than 28 years of experience. She has trained thousands of therapists both in the United States and internationally in "AEIOU: An Integrated Approach to Pediatric Feeding", a comprehensive professional training program that she developed and continues to teach. Nina provides education and support to parents of newborns and young children through her online learning platform to help children and their families learn to love food, enjoy family mealtimes, and thrive. She developed the "Baby-Cued Method™", a responsive feeding approach, to answer the many questions parents have about feeding their babies and transitioning to solid foods. Many parents feel worried about the next steps with feeding after breast or bottle, and the internet and social media have added to the confusion. She helps parents embrace the process simply and intuitively, without gimmicks or trends that could hinder the process. Nina also works in private practice in Baltimore, and with the Maryland Pediatric Group. A Certified Lactation Counselor and Certified Educator of Infant Massage, she specializes in infants with sucking dysfunction, tongue tie, and breast and/or bottle-feeding aversion. She has extensive expertise in diagnosis and treatment of infants and children with oral motor/feeding disorders, feeding tube dependency, autism, complex medical issues, and other developmental disabilities. Nina recently retired from her position as a Speech-Language Pathologist and pediatric feeding specialist for an acclaimed children's hospital after 25 years, where she founded the TOTs Program (for infants with feeding problems due to tethered oral tissue/tongue tie). She holds a Master of Science in Speech-Language Pathology from Loyola College of Maryland and a Master of Arts in Applied Healing Arts from the Tai Sophia Institute (now the Maryland University of Integrative Health). She is a board certified Holistic Health Practitioner and was trained in integrative nutrition through the Center for Mind Body Medicine's Food As Medicine program.

### Week Three October 23rd

7:00pm-10:30pm (US Eastern)

Live Broadcast Online 3 1/2 hours  
(includes 15-minute break)

- Video Presentations of Treatment/Case Studies: Sensory Food Aversion, Oral-motor, Tube-Weaning)
- Problem Solving, Group Discussion, Question & Answer

### Week Three Self-Paced Modules

(2 hours)

- Cups and Straws (31 min)
- Tricks With Tools; Tips From My Toolbox, Resources, and More (49 min)
- Bonus Downloads; Extend Your Learning Modules (40 min)

**This was the most informative and well delivered course I have ever been to! Nina was an excellent speaker that held my attention the whole time with her experience, empathy and compassion that she has for the families she works with. From what tools to use to how to handle behaviors, this class taught me so much. She brought so much insight from many different backgrounds and not just a clinical SLP background. Most importantly, her knowledge of non-verbal communication and her ability to work with families to gain trust with each other, made this class above and beyond any CEU I have ever attended. I have already recommended this course and will continue to do so!**
