Feeding Matters’ Shannon Goldwater Summit for Change, “Authentic Representation: The REAL Picture of Pediatric Feeding Disorder (PFD)”, understands that for optimal outcomes to be achieved it must be a team effort, which includes families. Families, professionals, and community partners will engage in dialogue to address pressing issues related to episodic care such as duration of care, breaks in service, treatment approaches, and insurance coverage through the use of case studies, panel discussions, and resource dissemination. This event will focus on meeting families exactly where they are while providing tangible, immediate, next steps to move forward and progress in their PFD journey.

60-Minute Concurrent Sessions

Stay tuned for highlights as we reveal these sessions this month!

20-Minute Talks

PFD in Infancy
- Effects of Infant-Driven Feeding in the NICU for Premature Infants with Comorbidities
- Physiological measures of breastfeeding: A comparison between term vs pre-term infants
- Feeding Challenges for Infants of Diabetic Mothers, a Research Review

Evaluating PFD
- Discriminant Validity of the Environment, Attitudes, Temperament, Sensory (EATS) Feeding Assessment
- Psychometric properties of SMART feeding tool: An interprofessional research study
- Comorbidities in Paediatric Feeding Disorders

Perspectives in PFD
- ABA’s Role in Feeding 101
- Harmonizing Feeding Therapy with Different Cognitive Developmental Stages in Pediatric Feeding Disorders
- Clinical Insights and Caregiver Voices: Home-Based Medically-Complex Tube Weaning

Delivering PFD Services
- Virtual family-based care for Avoidant/Restrictive Food Intake Disorder
- Meeting Halfway: A Multidisciplinary Approach to PFD Treatment in Children With Autism
- Addressing PFD in Neurodiverse Children in Schools: Success Stories and Lessons Learned
5-Minute Lightning Talks

- Important Evidence-Based Practice Factors to Consider in Pediatric Feeding Disorders
- Using parent-reported tools in assessment for Pediatric Feeding Disorder (PFD)
- Examining the Association between Maternal Postpartum Stress and Infant Non-Nutritive Suck
- Feeding Therapy Interventions and Frequency of Use: A Pilot Study
- Creative Mealtimes: Establishing a Sensory Feeding Group with Medically Complex Children
- Chewing in Minimally Verbal and Verbal Children with Autism Spectrum Disorder
- Health-Related Quality of Life of Parents of Children with Pediatric Feeding Disorder
- Feeding a Short Gut: A clinician/parent perspective
- Feeding Characteristics and Behaviors in Young Children with Food Allergies
- A Model for PFD Education in SLP Graduate Students: Knowledge and Skills
- Factors associated with thickened feedings and its impact at 1-2 months post-term
- FEEDS: A Transdisciplinary Approach to Navigating Early Childhood Feeding Challenges
- The Effectiveness of a 12 week Feeding Program Emphasizing Parental-Clinician Collaboration
