ARFID & PFD-2023 CONSENSUS SUMMIT

The aim of this summit was to produce a publication(s) supporting the eating disorder and feeding disorder communities in appropriate diagnosis and assessment of children with feeding difficulties.

Inclusion Criteria

We are dedicated to supporting a diverse body and endorse representation of all persons who serve the feeding community.

Participants from academia, research fields, in-patient care settings and community support settings were invited to attend in person and input was requested from the PFD community post conference.

Planned Outputs

- Publication to be submitted to the Journal of Pediatrics
- Collaboration with CHOA, Emory, and Harvard to provide professional education and transmission of knowledge, research actions and network development, and convening and consensus actions for PFD and ARFID assessment and management.
