

# Paediatric Feeding Foundations Program

May - August 2024 AEST (+12 months access)

Online

Live & Recorded

26+ hour course + Q&As

The Paediatric Feeding Foundations Program (PFFP) is designed to help you build confidence in feeding therapy, following a comprehensive framework. We'll provide you with a practical 'road-map' to guide your decision-making, along with clinic-ready tools, templates and resources to use with your feeding therapy clients.

## Participants have access to:

- ★ **Weekly Modules** - on-demand curriculum with a guided pathway over the four month course period. Complete at a time that suits you.
- ★ **Regular Group Connection calls** - regular, interactive live check-in sessions on Zoom
- ★ **Downloadable clinical tools, templates and resources** - assessment forms, tools and checklists
- ★ **Course Hub 12 months access** - access to the online course videos and materials

### At the end of the course...

Participants will have the opportunity to join the Feeding Therapy Lab - our group mentoring and learning support program that also provides extended access to the course.

## Learning Objectives:

1. To identify the body systems, medical conditions and developmental foundations that underpin feeding at all ages.
2. To describe how to conduct a thorough case history, oral motor assessment and feeding evaluation with children 6 months - 12 years of age.
3. To report how to collate assessment information and diagnose a paediatric feeding disorder to inform treatment plans
4. To discuss treatment principles and techniques for responsive feeding therapy, oral sensory motor therapies, developmental progressions in feeding, and dysphagia management.
5. To identify the resources, tools, processes and professional support required to set-up a feeding clinic and provide feeding therapy.

### Presenter Disclosures:

**Financial:** Carly receives income from Babble & Munch Learning, including this course & the Feeding Therapy Lab. Carly receives income from her clinical practice, Babble & Munch Feeding Therapy.  
**Non-Financial:** Carly is the parent of a child with feeding difficulties and shares some details from her own experiences.

## Who is this suitable for?

### Professional Background

Speech pathologists/SLPs, occupational therapists, physiotherapists or dietitians who have feeding therapy in their scope of practice. For practitioners who want to learn from an SLP working exclusively in paediatric feeding.

### Experience level

Beginner to intermediate level in paediatric feeding with children 6m-12yrs age.

### Prerequisites

No prerequisites required - you don't need to have a paediatric feeding caseload or any feeding experience to start!

### About Carly Veness...

Carly Veness, CPSP, IBCLC, MSPA, is a Certified Practising Speech Pathologist and International Board Certified Lactation Consultant (IBCLC) based in Melbourne, Australia, working in both clinical and research roles over the past 20+ years. Carly is the Founder & Principal Speech Pathologist at Babble & Munch Feeding Therapy, a private practice focused on infant & child feeding, and Babble & Munch Learning, an international training and professional support program for health professionals working in paediatric feeding. Carly also holds an appointment at the Royal Women's Hospital in the Neonatal Intensive & Special Care Unit & has a Graduate Diploma of Infant & Parent Mental Health.
